#### DETAILED ACTION

##### *Specification*

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

##### *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1,17,18, and 31-40 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 33,34, and 42 of U.S. Patent No. 6,286,498. Although the conflicting claims are not identical, they are not patentably distinct from each other because even though not specifically recited in claim 1, the superabrasive particles must be positively planted in the matrix support material, and it would have been an obvious matter of choice to one having ordinary skill in the art at the time the invention was made to have used a metal matrix in the invention of the

Art Unit: 3724

instant application since the examiner takes Official Notice that it is well known to use a metal in a matrix material to provide for better securing of particles therein. The exact type of tool would have been an obvious matter of design choice to one having ordinary skill in the art at the time the invention was made since clearly the matrix would superabrasive particles therein could be used with numerous applications that required the use of the superabrasive particles contained in a matrix.

***Allowable Subject Matter***

4. Claims 41-45 are allowed.

5. Claims 2-16, and 19-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy V Eley whose telephone number is 703-308-1824. The examiner can normally be reached on M-F.
